## Big Mountain CWMU Description

The Big Mountain-Deer CWMU is south and southeast of East Canyon Reservoir. East Canyon Creek cuts the Unit on the west side (**5000** to 5800 feet). From this point the unit rises in elevation to the east. When it catches its maximum elevation (**9300 feet**), it slopes down to the north in a block and to the south as a long finger, but the finger is shorter for mule deer than elk.

Because the Big Mountain-Moose Cooperative Wildlife Management Unit (CWMU) is based on much the same area as the Big Mountain-Deer CWMU the dominant land cover type is a mixture of the Inter-Mountain Basins Montane **Sagebrush Steppe** (62) and Rocky Mountain **Aspen Forest and Woodland** (22). Rocky Mountain Gambel **Oak-Mixed Montane Shrubland** (41) also covers much of the Unit. There are some small patches of Rocky Mountain **Bigtooth Maple Ravine Woodland** (23) and scattered patches of Rocky Mountain Mesic **Mixed Conifer Forest and Woodland** (32).
